1st

8th at Salt Works J. Radcliffe -
 Let. Jones. By getting better

at midnight called to visit Mrs Watrous ^{2nd} ^(Domic) Let. Stated that he had sat down in
 the bush some time previous (abt 2 mo) & pass'd a rush down the urethra while doing
 so a dog came behind him & he being startled look'd behind him & found the rush to
 pass into the & the Rush disj. since then he has had difficulty in making
 for 2^d. I gave J. M. Terri with a few drops of Laud^m & Effluant Pills
 about a fortnight previous & pass'd a catheter down the urethra wth being
 obstructed I tried a bougie this fast on some 1st & on draw'g it out a piece
 of rush 6ⁱⁿ long. came out it had a concretⁿ of white matter at
 both ends he says the rush used was three times as long. he had pass'd
 2 or 3 small stones, less in size than a small pea, previous to this. When arrived
 there I found the urinary passage obstructed by a large Calcul^s. wth pass'd along
 the urethra to the part just previous to its opening from the neck of the Scrotum
 this & another smaller, were pass'd the follow^g day they were cylindrical wth
 forward round pieces of the Rush

8th Month 1836

Elisa. Bet at Lesdillon died 20th of 8mo 1836. about 11 AM

Had been complain^g for sever^l m^{os} previous. about the commencement
of this ^{her complaints} for p^m in head. & on 6th 6mo visited her for ^{some} ~~complaint~~
~~similar~~ Catarrhal symptoms together with stoppage of the Catamenia.
Dyspnea Cough &c. edema of feet & legs. body had wasted considerably
in beginning of 7th m^o. She was seized with severe p^m of left side
the other symptoms remain^g same the p^m in side was ~~not~~ relieved
by bleed^g Bl^l & ^{the} mouth slightly ^{affected} with tart. this could almost eff
her very weak. Her feet ^{legs} swelled considerably. & the dyspnea ^{with purple spots upon them} very
troublesome but she seemed to recover her strength. A few days
previous to her death the symptoms encreased considerably & the ~~the~~
effusion went on rapidly until her death took place.

On opening the body 24 hrs after death. the veins app^r gorged with blood.
Yellowish serum ^{was found in} filled the abdomen the pericardium & left pleura were
filled to the utmost with it. not so much was found in the right side
the lungs black & slight adhesion at upper part ^{on both sides} to the spine. for w^h one or
two serous deposit were taken. The liver much enlarged ^{liver} with
adhesions not difficult to separate the upper pt of the liver near the
vena cava soft but its anterior surface hard light in color & filled
small white grains forming ^{inter} lines intersect in every direction. Spleen consid^{ly}
enlarged lobulated. Left right kidney. soft & enlarged. Uterus cod with
large veins ^{distended with} full of dark blood. its substance of a white fibro cartilaginous
structure. the cavity much diminished & the orifice nearly closed.

I certify that Private Michael Murphy of the 21st Reg^t. has been for some time labouring under an affectⁿ of the Chest. That his case requires more ^{comfort} ~~care~~ ^{comfort} attention than it can have at this Station ^{where} ~~there~~ ^{is} ~~being~~ no Hospital ~~for his reception here~~ I therefore recommend his being sent as soon as possible to head Quarters G. F. St^r D. A. Surgⁿ.

I certify that Private James Holden of the 21st Reg^t. has had an ^{drop} ~~affect~~ ^{drop} of the Throat some considerable time past which not improving ~~at this Station~~ ~~there~~ ~~being~~ no Hospital ~~at the Station~~ this place not being proper for the further treatment his case requires then being no Hospital ~~here~~ for his reception I recommend his being forwarded to the ~~Hospital~~ at Head Quarters by the first opportunity.
